

British Cedar Spec Sheet EZTMouldings

# BRITISH CEDAR

High-quality sustainably sourced British Cedar precision machined for trade, construction, and restoration projects.

## PRODUCT OVERVIEW

British Cedar is a versatile softwood renowned for its natural durability, dimensional stability, and attractive appearance. With its warm reddish-brown tones, distinctive grain, and natural resistance to moisture and decay, it is widely used across cladding, joinery, mouldings, and architectural applications.

At EZT Mouldings, our British Cedar is precision machined using advanced production equipment to deliver exceptional consistency, accuracy, and finish quality.

Suitable for both standard and bespoke mouldings, British Cedar offers an excellent combination of durability, workability, and natural character, making it ideal for residential, commercial, and restoration projects.

British Cedar is widely used for external cladding, garden structures, interior joinery, furniture, and architectural timber applications where durability and visual appeal are equally important.

Name: Thuja plicata
