

British Larch Spec Sheet EZTMouldings

# BRITISH LARCH

High-quality sustainably sourced British Larch precision machined for trade, construction, and restoration projects.

## PRODUCT OVERVIEW

British Larch is a strong and versatile softwood renowned for its natural durability, attractive grain, and distinctive reddish-brown heartwood. Combining strength, resilience, and visual appeal, it is widely used across cladding, joinery, structural timber, and architectural applications.

At EZT Mouldings, our British Larch is precision machined using advanced production equipment to deliver exceptional consistency, accuracy, and finish quality.

Suitable for both standard and bespoke mouldings, British Larch performs exceptionally well across residential, commercial, and restoration projects, offering excellent durability for both interior and exterior applications.

British Larch timber is commonly used for cladding, decking, fencing, structural joinery, garden structures, and architectural timber projects where strength, durability, and natural character are required..

Name: Larix decidua / Larix kaempferi

Origin: United Kingdom

Colour: Pale yellow sapwood with reddish-brown heartwood

Species: Softwood

Uses: Cladding, decking, fencing, joinery, structural timber, garden structure
