

SAPELE

High-quality sustainably sourced Sapele precision machined for trade, construction, and restoration projects.

PRODUCT OVERVIEW

Sapele is a premium hardwood renowned for its rich reddish-brown colour, attractive grain patterns, and excellent durability. Often chosen for its strength and visual appeal, Sapele is widely used in high-quality joinery, mouldings, architectural features, and interior applications where both performance and appearance are essential. Its distinctive grain and natural lustre create a refined finish that suits both traditional and contemporary projects.

At EZT Mouldings, our Sapele is precision machined using advanced production equipment to deliver exceptional consistency, accuracy, and finish quality.

Suitable for both standard and bespoke mouldings, Sapele combines durability, stability, and timeless character, making it an excellent choice for residential, commercial, and restoration projects.

Sapele timber is used for numerous mahogany like products, for example conservatories, door frames and solid wood doors, furniture and counter tops.

Name: Entandrophragma cylindricum

Origin: Africa

Colour: Medium to fairly dark reddish brown

Species: Tropical hardwoods

Uses: Interior/exterior joinery, shop fitting, furniture, moderate to high traffic flooring

Kiln Dried: Yes

Moisture Content: 10-12%

Durability: Moderately durable

Exterior/Interior: Interior & exterior

Grade: FAS

Mean Density: 640 Kg/m³
