

Western Red Cedar Spec Sheet EZTMouldings

WESTERN RED CIDER

High-quality sustainably sourced Western Red Cedar precision machined for trade, construction, and restoration projects.

PRODUCT OVERVIEW

Western Red Cedar is a premium softwood renowned for its natural durability, dimensional stability, and distinctive appearance. With its warm reddish-brown tones, straight grain, and lightweight properties, it is a popular choice for cladding, joinery, mouldings, and architectural applications where both performance and visual appeal are important. Its natural resistance to decay and moisture makes it particularly well suited to demanding interior and exterior environments.

At EZT Mouldings, our Western Red Cedar is precision machined using advanced production equipment to deliver exceptional consistency, accuracy, and finish quality.

Suitable for both standard and bespoke mouldings, Western Red Cedar combines long-lasting performance with natural beauty, making it an excellent choice for residential, commercial, and restoration projects.

Western Red Cedar timber is suitable for exterior cladding, greenhouses, sheds, bee-hives, shingles and light construction.

Name: Thuja plicata

Origin: Canada/North America

Colour: Reddish brown

Species: Softwoods

Uses: Cladding, decking, joinery – exterior, fences, gates, trellis, arbors, gazebos

Durability: Durable

Exterior/Interior: Exterior
